

## Biography

Foursome name: Muslim according to God Ibrahim Ali

Date of birth: 1/7/1977

- PhD/ Date of acquisition:(1/8/2019)

General Specialty: Sports Education / Precision Specialty:SportsPsychology

Scientific title: Professor / Date of acquisition: (14/9/2020)

Number of years of service in higher education: (15 years)

Number of years of service outside higher education: **no**

E-mail: sportdrmusle@gmail.com

Donor of the Bachelor's Degree: **University of Baghdad**

Date of acquisition: (1999-2000) ( )

Donor for master's degree: University of Babylon

Date of acquisition: (2003)

Doctoral Donor: **Diyala University**

Access date: (2019)

Title of the Master's :((behavior of elite football club teams and its relationship to the results of the league for the **2001-2002 season**)).

Researcher: Muslim according to God Ibrahim Tamimi

Supervisors:

A.M.D. Yasin Alwan Tamimi A.M. Dr. Adel Turki Hassan

Aggressive behavior among elite football clubs teams and their relationship to the results of the league for the season 2001-2002 »

**The letter contained five doors, and the first door contained**

Included in the introduction of the research, which included the introduction and the importance of the research. The importance of sports psychology and the prevalence of the phenomenon of aggressive behavior during sports competitions and their impact on the performance of players were discussed as research has tended to study a comparison in aggressive behavior between different sports without studying their causes and negative effects on the game.

As for the problem of research, it is that aggressive behavior is one of the problems that receive the attention of many social and educational circles because of the impact of this problem on the environment and society and its development, and that the nature of sports activity, which carries with it a competitive nature is an incentive for high-level games and that this competition causes excessive violence that results in the disturbances of effectiveness among competitors

**Search goal:**

- 1- Identifying the types of aggressive behavior among the teams of the elite football clubs and according to the **results of the participating teams**
- 2- **The** relationship between the dimensions of aggressive behavior and the **ranking of elite club league teams.**

### **Forcing research:**

1. There are morally significant differences in aggressive behavior between the participating teams and their approaches
2. There is an inverse and moral correlation between the dimensions of hostile behavior and the order of the teams participating in the league

### **The areas of research are**

- Human field: Elite football club teams in Iraq for the 2001-2002 season
- Temporal field: from 26 January 2002 to 1/7/2002 the second stage of the Elite League.
- Spatial area: football stadiums in Iraq.

This section also protects the definition of terms as the researcher touched on behavior, aggression and the role of the elite

**Title II:** And he used the theoretical studies and similar to the approach of the beginning to what aggression is, the definition of aggression and it is his, and the **theories of aggression as the** researcher touched on the analysis of the phenomenon of aggression in sports and the factors of aggression and its methods. Some similar studies and their conclusion and their relationship to the current research and the **guidance of** the coach to reduce aggressive behavior and finally included the door on the losers

**Title 3:** It included the research approach, where the sajad used the descriptive approach to suit the nature of the research on a sample consisting of (279) players who color the teams of the 20-year-old Dia al-Nakhin in Iraq football club, as well as the section included the tools and devices used in the research, the measure of aggressive behavior, scientific transactions, reconnaissance training and

statistical means. **Title 4:** Included in the results of the research and its discussion

**Title 5:** This section contained conclusions and recommendations where the researcher reached the following conclusions:

1. There is a moral difference between the three groups after the attack and in favor of coming first (students, air, police, Al-Zawraa, Najaf, Erbil)
2. There is no moral difference between the second two groups (Dohuk, Karkh, Port, Air Defense, Army, Samawah, Oil, Samarra) and the third (Nasiriyah, Industry, Kirkuk Ramadi, Diwaniyah Kazemia) after the attack."
3. There is a moral difference between the three groups after the verbal aggression and the reconciliation of the first group (students, air, al-Zawraa, police, Najaf Erbil)
4. There is no difference between the second two groups (Dohuk, Karkh, Mina, Air Defense, Jeesh, Samara, Dots, Samarra) and the third (Nasiriyah, Industry, Kirkuk, Ramadi, Diwaniyah, Kazemia after verbal aggression)

**In light of the findings of the researcher, he recommends: -**

- 1- The need for trainers to use a curriculum for psychological preparation, guidance and guidance, dealing with drowning and knowing their characteristics and level of aggression
- 2- Attention to the psychological preparation of teams and the development of the use of their psychological skills within the daily training curriculum in addition to physical preparation and skills.

Title of doctoral thesis: (Building and codifying the measure of social interaction of coaches from the point of view of the players and its relationship to the ranking of Premier League football teams for the 2017-2018 season))

**Supervised**

**Dr. A. Zuhair Mustafa**

**1440 Ah 2019**

The thesis included five doors and as follows:

**Section 1: Introducing research, which includes the introduction to the research and its importance within reach:**

Psychology is one of the oldest sciences that is highly popular by researchers and scholars to know the human psyche and the characteristics and characteristics of each stage of his life and social interaction is an important area that the coach should care about, the successful coach believes that the cohesion of the team is the decisive factor in its results, so the coach is interested in the dynamic interaction between the members of the team hence the importance of research in the presence of a tool to measure social interaction (strengthened)S social interaction ) for coaches from the point of view of the players and knowing the relationship of interaction between the arrangement of elite league teams football, but the problem of research is that most coaches care and focus on the physical, skilled and planning aspects with little interest in the nature of social relations between the coach and the player and between the members of the team as a whole, that club players lack social interaction with their

coaches in their dealings which leads to the presence of space of fursThe researcher used the descriptive method in the survey method, and the research community included all the advanced players in the Iraqi Premier League clubs numbering (677) players out of (20) clubs, and the research sample consisted of two samples, namely the sample building scale, which consisted of (166) players from clubs (Air Force, Hussein, Electricity, Oil, Karbala, Middle Oil, and random selection of the season ) 2018/2017), the standardization sample, the group on which the test was applied with the aim of deriving the standards and levels that were formed from

(366) Players of Iraqi Premier League football clubs are club (Al Bahri, Borders, Diwanayah, Al-Zawraa, Samawah, police, electrical industries, students, port, Najaf, Rakho, Southern Points, Isan Oil) for the season

(2018/2017) and selected randomly.

The researcher used the appropriate tools for his research, including conducting research interviews and distributing questionnaire forms related to his entire work, and then took research steps to build and codify the measure of social interaction and extract results through the statistical bag (SPSS) )

Title IV included the presentation, analysis and discussion of the results, reinforced by scientific sources.

**The researcher in Title V came to the most important conclusions:**

Building and codifying the measure of social interaction of Iraqi Premier League football coaches from the point of view of the players.

The researcher recommends the need to pay attention to social interaction by Iraqi Premier League coaches and their players within clubs.
