AH 2013

AD 1434

---

The letter included five chapters:

Chapter One - Introduction to Research

Introduction and research importance

Balance is a general ability that is of great importance in life in general and in the sports field in particular. It is an important component in the performance of basic motor skills in most sports activities, especially those that require accuracy in performance.

In order for the player to reach the highest level of sports performance, there must be integration between Physical, psychological and skill skills. The player who is characterized by kinetic balance, which is characterized by a high ability to preserve the external equilibrium of his body in a manner commensurate in quantity and quality with what is required by movement and sporting skill.

Emotion is an integrated response of the organism that depends on the perception of the external or internal situation, and it includes complex emotional changes and physiological changes that include the muscular, bloody, glandular and visceral systems.

The football penalty kick is one of the skills that requires diversity in its movements and accuracy of its performance during the implementation of the penalty kick.
