Academic program description guide

2024

the introduction:

The educational program is considered a coordinated and organized package of academic courses that includes procedures and experiences organized in the form of academic vocabulary, the main purpose of which is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program. The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that students are working to acquire based on the objectives of the academic program. The importance is evident. This description represents the cornerstone of obtaining program accreditation, and the teaching staff participates in writing it under the supervision of the scientific committees in the scientific departments. This guide, in its second edition, includes a description of the academic program after updating vocabulary and paragraphs. The previous guide in light of the latest developments in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, quarterly), in addition to adopting the description of the academic program circulated according to the letter of the Department of Studies T.M. 3/2906 on 5/3/2023, while concerning programs which relies on the Bologna Track as a basis for its work. In this area, we can only emphasize the importance of writing descriptions of academic programs and courses to ensure the smooth conduct of the educational process.

Concepts and terminology:

Description of the academic program The description of the academic program provides a brief summary of its vision, mission, and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course description It provides a necessary summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities. It is a gallows, according to the program description.

See the program An ambitious picture for the future of the academic program, to be an advanced, inspiring, motivating, realistic, and applicable program.

Program message: The objectives and activities necessary to achieve them in a concise way, and it also determines the paths of development of the program

Program Goals These are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Program structure: All courses/study subjects included in the academic program according to the approved learning system (semester, annual, Bologna track), whether you are required (ministry, university, college, or scientific department), along with the number of study units.

Learning Outcomes: A compatible set of knowledge, skills, and values that the student has acquired after successfully completing the academic program. The learning outcomes for each course must be determined in a way that achieves the program's objectives.

Teaching and learning strategies: They are the strategies used by a faculty member to develop the student's teaching and learning, and they are plans that are followed to reach the learning goals. That is, it describes all classroom and extracurricular activities to achieve the learning outcomes of the programme.

Academic program description form

University Name: Dial UniversityYes

College/Institute: College of Physical Education and Sports Sciences

scientific department: Branch ofTeam games

Name of the academic or professional program: Bachelor of Physical Education and Sports Sciences

Name of final certificate: Bachelor's degree in Physical Education and Sports Science

School system:annual

Description preparation date:3/6/2024

File filling date:3/6/2024

Signature Signature:

1- See the program

Remember to see the program as stated in the university bulletin and website.

Diyala University seeks scientific leadership, excellence and creativity in the fields of higher education and scientific research to serve the community and enhance its local, regional and international standing to reach the highest levels of quality and international accreditation.

2- Program message

State the program's mission as stated in the university's bulletin and website.

Providing effective academic university education through continuous development of academic programs in many specializations in light of the requirements of development plans to serve the labor market and contribute to promoting sustainable development.

3- Program Goals

General statements that describe what the program or institution intends to achieve.

1. building A distinguished educational institution within international standards that meets the requirements of the local, regional and international community in accordance with the directions of the Ministry of Higher Education and Scientific Research.
2. Creating a stimulating environment for teaching, learning and creativity by developing and updating scientific curricula and training and evaluation methods to keep pace with the requirements of the labor market.
3. Keeping pace with technological development in the fields of blended e-learning and developing educational and academic programs to adapt university students and teaching staff

4- Program accreditation

Does the program have program accreditation? From which side? both

5- Other external influences

Is there a sponsor for the program? both

6- Program structure

comments*	percentage	Study unit	Number of	Program
-----------	------------	------------	-----------	---------

			courses	structure
Basic		2	1	Enterprise requirements

7-Program description				
Credit hours		Name of the course or course	Course or course code	Year/level
practical	theoretical	soccer		2023- 2024
√				

8 - Expected learning outcomes of the program	
Knowledge	
Statement of learning outcomes 1	Learning outcomes 1
Highlighting the student's personality in a way that develops him	A1-Enabling students to obtain the knowledge required to understand mathematical theories and lawshelpStudents to know the relationship of the program and its academic elements (courses or subjects) with the awarded certificate and future job qualifications.
-Increasing the student's self-confidence. -Highlighting the hidden talents of the student	A2-Helping students to know the teaching and learning methods that help them achieve the targeted learning outcomes in the theoretical section
-Highlighting students' teamwork	A3- That the student be able to perform and practically apply all individual and group games

Skills	
Statement of learning outcomes	Learning Outcomes
Developing students in the skillful performance of the practical games included in the program	Helping students apply the theoretical and practical subjects they have learned inside and outside the university setting
Statement of learning outcomes 3	Learning outcomes 3
Increasing communication between individuals, which contributes to building a learning community	Helping students apply their ideas and talents inside and outside the university setting.
Value	
Statement of learning outcomes 4	Learning outcomes 4
Learn to set the right priorities for any problem	Cooperation development Brotherhood and developing the spirit of determination among students
Statement of learning outcomes 5	Learning outcomes 5
Developing respect for time and time in completing and implementing work. Developing the spirit of fair competition among work groups in pursuit of quality work, excellence and diversity in performance.	self evaluation. -Leadership evaluation. -Appreciating the efforts of scientists

9- Teaching and learning strategies

Teaching and learning strategies and methods adopted in implementing the program in general

strategy education Cooperative.

Learning strategy improvisation games.

Teaching strategy brainstorming.

Panorama education strategy.

Education strategy collaborative concept planning.

Education strategy one minute paper.

Education strategy real time feedback

Education strategy notes series.

Education strategy mind mapping

Modeling learning strategy It is known as social learning, in which the individual acquires and learns responses and new behavioral patterns in a social context or situation through observation or attention. In general, it is an explanatory method of education in which experiences are employed as well as methods and models...

10- Evaluation methods

Implementing it in all stages of the program in general.

Written exams - Oral exams-Electronic tests - daily tests

The college has relied on clear, high-quality evaluation methods and tools for student learning in order to maintain the quality of the graduate and the academic reputation of the college. This is embodied in the university's regulations and the requirements for continuous evaluation of students, provided that there are types There are several evaluation methods in order to ensure the quality of the graduate, which constitutes the outcome The final stage of the educational process, and one of the most important methods of evaluation:

A - Objective tests measure knowledge of facts, their comprehension, and the application of scientific knowledge In new situations and remembering is measured through the following:-

True and false questions.

Multiple choice questions.

Interview questions(matching items).

Completion questions(completion).

Practical tests concern the following matters:-

The ability to perform motor and skill sports (Football andBasketball, volleyball and handball...)

aFor sports, understanding the scientific and practical material, playing laws and principles.
The ability to recall, relate and interpret.
Simple application of knowledge in interpreting data, Diagnosis and problem solving.
It is done by the following:-
Connection test/open questions-
Questions that have a specific answer.
Which is based on motivating the student with questions that do not have a specific answer.
Possessing the skill in organization.
Possessing the skill in arranging ideas.
Avoid cheating and confront it.

11- Teaching profession					
Faculty members.					
Preparing the teaching staff		Requirements /skillsprivate (If any)	Specialization		Scientific rank
lecturer	angel		private	general	
	√		soccer	EducationPhysical andSports science	aD., A.M.D., M.D

Professional development
Orienting new faculty members
 Briefly classifies the process used to orient new, visiting, full-time, and part-time faculty at the institution and department levels.
Professional development for members of the teaching profession
 Briefly describe the academic and professional development plan and arrangements for faculty members such as teaching and learning strategies, and assessmentLearning Outcomes, professional development, etc.

12 - Acceptance criterion
 Establishing regulations related to enrollment in the college or institute, whether central admission or others mentioned
 -The average of students in the sixth year (preparatory, vocational), through which admission to the university level takes place.
 -Acceptance by the Olympic Committee (only for champion athletes).

-Raising the College of Physical Education and Sciences' acceptance rate equivalent to the acceptance rate of the Colleges of Engineering and Sciences.

13-The most important sources of information about the program

Remember briefly

The curriculum approved by the Ministry of Higher Education and Scientific Research and its guidelines.

- Decisions and recommendations of scientific committees in physical education and sports sciences
- Courses in teaching methods.
- Description of courses.
- Courses in civil society organizations.
- Conferences, seminars, workshops and panel discussions.
- Relevant state institutions.
- Graduates Unit
- Internet searches for similar experiences.
- Personal experiences.

-Scientific sources approved within the curriculum for the stage in which the education takes place

-The curriculum approved by the Ministry is unified for all colleges of physical education in Iraq.

-The rules of the Olympic Games are taught by a specialist teacher.

-Equipping colleges with practical laboratories, halls, and playgrounds for the subjects taught.

14-Program development plan

The program works to develop the student's academic personality in a manner commensurate with the ambitions of the modern state. - Highlighting the strengths of students in a way that allows them to form a leadership personality in the future. - Extracting the student's hidden talents to develop his field of work and raise the level of education.

-Modern scientific sources and the latest scientific research are reviewed periodically, through which the prescribed curriculum is developed. -

Theoretical and practical material are combined to develop the curriculum.

Program skills chart															
Learning outcomes required from the programme															
Value				Skills				Knowledge				Essential or optional?	Course Name	Course Code	Year/level
